1 Where and how is your organization's data stored?

2 What type of personal data is stored or used by your organization?

3 How many third parties have access to your organization's personal data?

4 Do you have personal data protection policies?

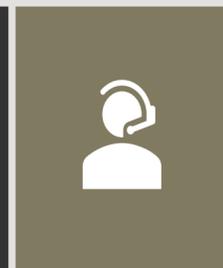

5 What measures are in place at your organization to protect the personal data of your employees and customers?

6 Do you have efficient practices and internal controls in place to ensure personal data security?

TOP 4 TIPS

Train your employees on personal data protection best practices.

Contact us to start thinking about how to align your business with the new requirements.

Get acquainted with Bill 64 and its implications on your business.

Put a process in place to adequately respond to requests from your employees and customers who may ask for their personal data.
